Summary

Aspiring Software Engineer with a strong foundation in cloud computing and machine learning. Experienced in building cloud-based applications and web interfaces using AWS and modern technologies. Skilled in Python, Java, and web development with a focus on scalable and efficient solutions.

Technical Skills

Languages: Python, Java, JavaScript

Web Technologies: HTML, CSS

Cloud & Tools: AWS, GitHub, Canva

Technologies: Machine Learning, NLP, REST APIs

Projects

Text Summarization using ML Model 2023 – Present
Machine Learning & Cloud Project *Python, NLP, Pegasus, AWS*

- Developed an abstractive text summarization system using Pegasus model
- Designed frontend interface for user interaction and summary display
- Integrated ML model with cloud deployment for scalable usage
- Enhanced usability through efficient UI design

College Chatbot System 2023
Web & AI Project *Python, JavaScript, HTML, CSS*

- Built a chatbot to assist students with basic college-related queries
- Implemented user-friendly interface for seamless interaction
- Improved accessibility of information through automation

Cloud-Based Website Hosting 2023
Cloud Computing Project *AWS*

- Deployed and managed a website using AWS services
- Configured hosting environment ensuring availability and performance
- Gained practical exposure to cloud storage and deployment

Education

VIT Bhopal University Bhopal, India
B.Tech in Computer Science Engineering (Cloud Automation) *2023 – 2027*
CGPA: 8.1

Christ The College School India
Class XII *2023*
Percentage: 69%

Christ The College School India
Class X
Percentage: 85%

Certifications

Google IT Support Certificate

Bits and Bytes of Computer Networking

IoT Certification (NPTEL)
